## Serial Episode 5

*In this episode, the narrator and her friend actually drive the route that Jay described in order to test its plausibility. At the end of their drive, they were totally unconvinced that the story was true. The jury, meanwhile, took less than two hours to agree that Adnan was guilty. Look at the evidence yourself, and come up with your own conclusion.*

1. On the map provided, plot the locations (and times) of the calls made the afternoon and evening of the 13th.

2. When you're done, compare your map to your notes on Jay's story. To what degree does the map corroborate Jay's story? Is it truthful enough to convict Adnan; is it so impossible that you have to throw out Jay's testimony; or is it somewhere in the middle?

**Explain your answer in a well written argument paragraph.**

Vocabulary from Episode 5. For each word, write the definition and the sentence that uses the word. If needed, use the timestamps to pause or go back.
